**These instructions are the steps needed to operate this program correctly.**

Open the following folders to access the Server application as shown in the figure above. Be sure to launch it **ONLY ONCE**, this program only need one instance of a server.

Open the following folders to access the Client application as shown in the figure below. There can be several launches of the client application.

Launch the client application. This application can be launched more the once for multiple users

In using the Client application, a user name is recommended but not required. A client can change font color, font size, and font type. Whenever a client chooses to log out or close their window to end their session, all other clients will be notified as you can see below.
