

Setting up

Each of the following folders have a configuration file included in them.

-  BinDashBoard
-  KanbanStationApplication
-  KanbanStationsDashBorad
-  SQLConfig

The configuration files are as follow.

-  BinDashBoard.exe.config
-  KanbanStationApplication.exe.config
-  KanbanStationRunner.exe.config
-  KanbanStationsDashBorad.exe.config
-  SQLConfig.exe.config

In each file the following is the connection string must be changed to the default database server.

```
<?xml version="1.0" encoding="utf-8" ?>
<configuration>
  <startup>
    <supportedRuntime version="v4.0" sku=".NETFramework,Version=v4.5.2" />
  </startup>
  <connectionStrings>
    <add name="conn" providerName="System.Data.sqlclient" connectionString="Provider=SQLLEDB.1;Integrated Security=SSPI;Persist Security Info=False;Initial Catalog=Kanban;Data Source=SERVER-708BCDAA" />
  </connectionStrings>
</configuration>
```

Once this has been done, the stations should be run in the following order.

1. KanbanDashBoard (On one station only)
2. KanbanStationApplication (One for each computer)
3. KanbanStationRunner (On one Station only)
4. BinDashBoard (Each station on a computer)
5. SQLConfig (On one station only)
